SUMMARY

Full-Stack Developer and 3rd-year CS student with proven experience building production-ready PERN and MERN stack applications. Delivered 6+ complete projects spanning social commerce, e-commerce, real-time collaboration, mobile app development, and cloud deployment. **National Hackathon Runner-Up (SAH 2.0), GSSoC '26 Open Source Contributor**, active hackathon participant, and AWS certified, with 600+ competitive programming problems solved and LeetCode rating of **1581**. Exploring LLMs, LangGraph, and AI-powered application development. Actively seeking Software Engineering internships.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python, Java, C, SQL
Frontend: React.js, React Native, HTML5, CSS3, TailwindCSS, Bootstrap, Zustand, Framer Motion
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, bcrypt, Multer, Nodemailer, node-cron, Supabase, Clerk
Databases: PostgreSQL, MongoDB, MySQL
AI/ML: LangGraph, LLM Integration, OpenAI/Anthropic APIs
Tools & DevOps: Git/GitHub, GitHub Actions, CI/CD, Docker, AWS (EC2, ECS, Cloud Foundations, Cloud Architecting), Redis, Postman, Linux

PROJECTS

Bank Ledger System May – June 2026
Node.js, Express.js, MongoDB, JWT, bcrypt, Nodemailer, node-cron, GitHub Actions, AWS EC2

- Developed a production-ready RESTful Bank Ledger API using **Node.js** and **Express.js v5** with **MongoDB** (Mongoose) for managing user accounts, transactions, and ledger entries with full MVC architecture
- Implemented secure authentication using **JWT** and **bcryptjs** for password hashing, with **cookie-parser** for session management; integrated **Nodemailer** and **node-cron** for automated notifications and scheduled jobs like interest calculation
- Configured an end-to-end **CI/CD pipeline using GitHub Actions** to automate build and deployment workflows on every push; deployed and hosted on **AWS EC2** with environment configuration managed via **dotenv**

HomeHive – Real Estate Property Listing App June – July 2026
React Native, Expo, TypeScript, NativeWind, Zustand

- Built a cross-platform mobile app using **React Native** and **Expo** for browsing, searching, and listing real estate properties, with file-based routing for smooth screen navigation across iOS and Android
- Developed the entire codebase in **TypeScript** with strict typing for props, API responses, and navigation params, and styled the UI with **NativeWind** for a consistent, responsive design system
- Managed global app state (property listings, favorites, user preferences) using **Zustand**, and structured reusable custom hooks and components to keep the codebase scalable as features grow

SocialBazar – Social Media Marketplace | *React.js, Node.js, Express.js, PostgreSQL, Zustand* JAN 2026

- Built a full-stack social commerce platform where users can post product listings, follow each other, interact via likes/comments, and complete peer-to-peer transactions – combining the functionality of a social network and a marketplace
- Engineered a relational **PostgreSQL** schema supporting complex queries for user feeds, product listings, and transaction history; exposed via scalable RESTful APIs with layered middleware, and implemented infinite-scroll feeds with **Zustand** for global state
- Secured the platform with JWT-based authentication, role-based access control (buyer/seller/admin), and bcrypt password hashing, preventing unauthorized access to sensitive routes

Real-Time Collaborative Code Editor | *React.js, Node.js, Socket.io, Yjs, Docker, AWS ECS* 2026

- Built a production-grade collaborative code editor (similar to Google Docs for code) where multiple users can join rooms and edit code simultaneously with real-time sync powered by **Yjs** and WebSockets (**Socket.io**)
- Containerized the full-stack application using **Docker** with multi-stage builds to optimize image size; integrated Monaco Editor (VS Code's editor engine) on the frontend for a rich coding experience

- Deployed the application on **AWS ECS** via ECR for scalable cloud hosting, architecting a microservices-ready system to handle concurrent multi-user sessions with a reverse proxy setup

Scatch – E-Commerce Platform | Node.js, Express.js, MongoDB, Multer, EJS2025

- Developed an end-to-end e-commerce web app with full purchase flow: user registration, product browsing, cart management, and order placement
- Built a feature-rich admin dashboard for product creation, image uploads (**Multer**), inventory control, and order tracking, following MVC architecture for clean separation of concerns
- Hardened security with JWT authentication, bcrypt hashing, and session-based route protection for both user and admin surfaces

ACHIEVEMENTS & HACKATHONS

GirlScript Summer of Code (GSSoC) 2026 – Open Source ContributorRemote2026

Contributed to open-source projects across the GSSoC program

- Actively contributed to open-source repositories as part of GSSoC '26, submitting pull requests, fixing issues, and collaborating with maintainers on real-world codebases

SAH 2.0 – Smart ABES Hackathon | 1st Runner-Up (2nd Place)ABES Engineering College2025

National-Level Hackathon – competed against teams from across India

- Secured 2nd place out of teams from colleges across India, delivering a working full-stack prototype under time constraints

KIET AI Arena – 30-Hour AI HackathonKIET Group of Institutions2025

AI-Powered Interior Designer – React.js, Node.js, LLM APIs

- Built an AI-powered interior design assistant within 30 hours that generates room layout suggestions and decor recommendations based on user preferences using LLM APIs
- Integrated image analysis with AI to analyze existing room photos and suggest contextual redesign options

COMPETITIVE PROGRAMMING

LeetCode (shahid310) | CodeChef (shahid310) | GeeksforGeeks | HackerRank

700+ Problems Solved across DSA topics – Arrays, Sorting & Searching

- **LeetCode:** Rating **1581** | 100+ problems solved | **50-Day Badge** for consistent daily practice
- **CodeChef:** Rating **1198** | 350+ problems solved
- **GeeksforGeeks:** 100+ problems solved covering core DSA concepts
- **HackerRank:** 150+ problems solved across SQL and problem-solving domains
- **Contests:** ACPC (ABES ACM Programming Contest), Clash of Coders (ABES), KIET Coding Contest, and multiple inter-college coding competitions

EDUCATION

ABES Engineering CollegeGhaziabad, India

B.Tech in Computer Science & Engineering – 3rd Year (5th Semester)May 2028

Amrit Public SchoolMau, India

Class XII & X – CBSE2024 & 2022

CERTIFICATIONS

AWS Academy Graduate – Cloud Architecting | Amazon Web Services2025

AWS Academy Graduate – Cloud Foundations | Amazon Web ServicesDec 2024

SQL Certificate | HackerRank

AWS Cloud | GeeksforGeeks

ReactJS Development | GeeksforGeeks

SQL Database Management | Udemy

Git Version Control | Udemy
